## PROFESSIONAL SUMMARY

---

Full-Stack Developer with experience building scalable enterprise web applications using React, Vue.js, Laravel, and modern JavaScript framework. Proven ability to design and implement role-based systems, ticketing platforms, and workflow management tools, deployed in production environments. Strong background in frontend and backend architecture, REST API integration, and system performance optimization. Passionate about building reliable systems, solving complex problems, and delivering high-quality software in Agile engineering teams.

## TECHNICAL SKILLS

---

- **Frontend:** Vue.js, React, Next.js, JavaScript (ES6+), HTML5, CSS3
- **Backend:** Laravel, PHP, REST API Development
- **Mobile:** Android Development (Java)
- **Database:** MySQL, Microsoft SQL Server (SSMS), Firebase
- **DevOps & Tools:** Git, GitHub, GitLab, IIS, Azure
- **Methodologies:** Agile, Scrum

## PROFESSIONAL EXPERIENCE

---

### VST-ECS Phils. Inc

Full Stack Developer

Eusebio, Pasig City

August 2023 - Present

- Developed and maintained enterprise-grade web applications using Vue.js, Laravel, MySQL, and MSSQL in a production environment.
- Designed and implemented a centralized role-based and workflow management system supporting employees, engineers, and administrators.
- Implemented SLA tracking automated workflows, and real-time status updates, improving issue tracking and operational visibility.
- Managed production deployments via IIS, ensuring system availability, security and performance.
- Collaborated in Agile Scrum teams, contributing sprint planning, code review, and feature delivery.
- Led debugging and optimization efforts to improve application reliability and maintainability.

### Decode Technologies

Full Stack Developer Intern

Fairview, Quezon City

January 2023 - May 2023

- Developed a **Vue.js-based Inventory Management System**, improving data management and operational workflows.
- Assisted in optimizing legacy systems components and resolving functional defects.
- Applied Git version control and collaborative development practices using GitHub and GitLab

## KEY PROJECTS

---

### Ticketing System

Designed and developed a centralized enterprise ticketing platform supporting employees, engineers, and administrators.

Key Features:

- Role-based access control
- SLA monitoring and tracking
- Ticket Lifecycles management
- Real-time ticket updates

### QCA (Quality Control and Assurance) System

Developed a web-based quality management platform used to track product quality issues, inventory concerns, and customer feedback.

- Implemented workflow tracking and reporting features.
- Improved cross-department collaboration through structured issue management.
- 

### eHataw – Mobile Fitness Application

Developed an Android fitness application delivering BMI-based personalized Zumba workout programs.

- Implemented real-time calorie tracking and dietary suggestions.
- Integrated **Firestore Authentication and real-time database services.**

**Tech:** Java, Android Studio, Firebase

## EDUCATION

---

### Bulacan State University

**Bustos, Bulacan**

Bachelor of Science in Information Technology

Graduated Cum Laude

GPA: 1.5

President - Web and Mobile Development Student Organization (WEMOST)

P.R.O - Union of Information Technology and Engineering Students (UNITES)

## CERTIFICATION

---

- Scrum Foundation Professional Certificate (SFPC) — CertiProf, 2024
- Civil Service Certificate (Honor Graduate Eligibility)
